Hi [REDACTED] -

Thanks for the information. I provided in **bold text** below updated information that we have rec'd from the property owners re: the wastewater system serving their property.

Unfortunately, I cannot advise you about continuing the work that you are doing re: LCC compliance in the Hanelei Bay Watershed. I think the information you found is very similar to what we are tracking. We will follow-up with the non-responders until we get confirmation that there is no LCC serving the property or the LCC replaced. However, I do appreciate the information and field verification you have done and will do the best I can to continue to work with you to verify information as needed or research additional properties.

Regards -

Kate

Dear Kate,

5-5-2011

I inspected about 1/3 of the properties on the TMK list you sent me. Before I continue I would appreciate your opinion before attempting to gather more information. The other sites are more difficult to access, some impossible, across the Hanalei river or protected by highly restricted farmlands.

I have indicated a few "single houses" which may not apply to your directive. All others appear to be multiple dwellings as defined in your notifications. This information is supplied in confidence. Thank you again for

supplying
the TMK information which may help improve the quality of our ocean waters which have shown a dramatic
increase
in turbidity, especially during the calm summer months. Please keep me updated on compliances.
Sincerely, [REDACTED]
